**LAKE MCKENZIE CIRCUIT**

**Special Features**: Walk out to boatie lookout.

**Directions**: From the Village Store, follow the bitumen road up to the hill to the junction. Turn right and walk about 1km, until you come to a junction. Follow the bitumen road with the virus on your right.

**Thamarrurr**: The climb up to Stilling Hill is long and gentle. On the northern aspect you’ll cross Lake Wabby Rd (glassy, not that this is signposted). Follow the bitumen road to Northern Rd. Cross the road (as indicated by the sign) and follow the walking track to Lake McKenzies Rd. Turn left and follow the road uphill for 20min before turning left through the beach gate.

**To Return to the Resort**: Retrace your steps back to the Village Store.

---

**BEERILBEE TRAIL**

**Special Features**: Wildlife affected regeneration bushland can be seen. Look for large forest trees with foliage inhabited by sugar and eucalyptus gliders, cockatoos, finches and forest kingfishers. Circular-shaped hard-coated birdboxes can be found along the track, particularly near fang algal and understorey white tea species.

**Directions**: From the Village Store follow the bitumen road up to the junction. Turn right and walk about 1km before turning left at the sign. Follow the bitumen road with the virus on your right.

**Thamarrurr**: The climb up to Stilling Hill is long and gentle. On the northern aspect you’ll cross Lake Wabby Rd (glassy, not that this is signposted). Follow the bitumen road to Northern Rd. Cross the road (as indicated by the sign) and follow the walking track to Lake McKenzies Rd. Turn left and follow the road uphill for 20min before turning left through the beach gate.

**To Return to the Resort**: Retrace your steps back to the Village Store. Turn left at the lookout and follow the sand track downhill to The Sandy Bay and the jetty (see Great Sandy Strait Walk for more information).

---

**MCKENZIES JETTY WALK**

**Special Features**: Built to accommodate the logging trade on Fraser Island, pylons of this disused jetty can still be seen today and make for stunning photos at dawn and dusk.

**Directions**: Walk south along the beach for 2.5km until you reach the jetty. Please note this can be slightly bumpy in places at low tide.

**To Return to the Resort**: Retrace your steps.

---

**BEERILBEE TRAIL**

**Special Features**: Between 1942 and 1945 several hundred soldiers trained on Fraser Island before being deployed into Asia. Explore the area and the intertidal shelter to learn more about these 2-Four soldiers.

**Directions**: From the Village Store cross over the creek to a nearby mining. Cross the mining and you’ll see a path leading to the jetty. Please see the WWII Commando School site option 1.

---

**WW11 COMMANDO SCHOOL WALK**

**Special Features**: Good vantage point of the Great Sandy Strait and surrounding islands. Look up into the tall eucalypts and you may spot the stick-peeking nesting platforms of the white-breasted sea eagles.

**Directions**: Walk back at the intersection continue on the walking track towards Kingfisher Bay Resort. This track is well marked to keep following the ocean. After 15min, you’ll see a path leading to the jetty. Please see option 2 of WWII Commando School Walk for more information.

---

**SOUTHERN LOOKOUT WALK**

**Special Features**: Spectacular views from the top of the dunes over the Great Sandy Strait and the Northern Breakwater. Walking trail is through Big Woody, Little Woody, Woody Point and Devil Island.

**Directions**: The walking trail is through Big Woody, Little Woody, Woody Point and Devil Island.

**Thamarrurr**: The walking trail is through Big Woody, Little Woody, Woody Point and Devil Island.

**To Return to the Resort**: Retrace your steps up the hill to the Northern Breakwater.

---

**GREAT SANDY STRAIT WALK**

**Special Features**: Walk through Eucalypt woodlands and spot the Butchulla Star Trees. There is a sensational view when you reach the top so don’t forget your camera.

**Directions**: The walking trail is through Big Woody, Little Woody, Woody Point and Devil Island.

---

**DUNDONGA CREEK WALK**

**Special Features**: Views from the Great Sandy Northern Outlook are breathtaking as you look out over the Great Sandy Strait, Kingfisher Bay, Picnic and Woody Islands. Old growth mangrove forests are alive with butterflies and specialised birds.

**Directions**: The walking trail is through Big Woody, Little Woody, Woody Point and Devil Island.

**Kingfisher Bay Resort**

**Self Guided Walks**: Enjoy the beauty of Kingfisher Bay with these self-guided walks. Each walk provides a different perspective of the area, offering opportunities for hiking, swimming, and picnicking. The walks range in difficulty from easy to moderate, and are suitable for all ages and fitness levels. With these self-guided walks, you can explore the area at your own pace and discover the beauty of Kingfisher Bay for yourself.
TAKE TO THE TRACKS IN AND AROUND KINGFISHER BAY RESORT

What better way to immerse yourself in the sights and sounds of World Heritage-listed Fraser Island, than by taking time to smell the wild flowers and enjoy the stunning views. There are a number of great short and day walks in and around the resort – here’s our pick of the best.

STAYING SAFE
- Always wear sturdy footwear, take plenty of water, a map, sunscreen, hat and a first aid kit with you. In Queensland, we recommend you avoid walking in the hottest part of the day.
- Please notify the team at Reception of your intended route and the number of walkers.
- Please register your estimated return and be sure to stay on tracks and follow trail markers.

TREAD LIGHTLY
We invite you to help us care for Fraser Island by only taking photos and leaving footprints.
- To avoid damaging the fragile flora and fauna, please keep to the roads and walking trails.
- Litter is unattractive and harmful to wildlife. Please be eco-friendly and pick up any rubbish you see.
- Please do not drop cigarette butts on the ground.

DINGO CALENDAR
Dingoes’ natural behaviour changes throughout the year. They are more aggressive in autumn and summer, when they are vying for dominance over other dingoes in the pack and competing for food.

AUTUMN (MAR-MAY)
Mating is a time for testing dominance, protecting territories and expelling intruders from other packs.

WINTER (JUN-AUG)
Although the whole pack pitches in, a female dingoe with pups is naturally protective and potentially aggressive. She needs to find food for herself and her pups. Unlike domestic dogs, dingoes only have pups once a year.

SPRING (SEP-NOV)
Pups are learning survival skills from their parents. If potential food sources from humans are available, pups may not learn natural hunting skills.

SUMMER (DEC-FEB)
Pups learn pack role through play showing aggressive behaviour to gain dominance. Young dingoes will try to dominate people, especially children.

RESPECT OUR WILD ANIMALS
Feeding, touching or approaching native animals alters their patterns of behaviour, endangering them and/or yourself.

- Be Dingo Safe
- Don’t feed the animals.
- Keep your kids close and walk in groups.
- Don’t take your food to the lake shores or beaches.
- If you feel threatened, stand to your full height, face the dingo with your arms crossed, keep eye contact and back away. If in pairs, stand back-to-back. Never run or wave your arms.
- Stay alert and carry a stick for protection. If attacked, defend yourself aggressively with a stick or team.
